SUMMIT OVERVIEW

India is rapidly emerging as one of the world's fastest-growing economies and a preferred destination for global investment, advanced manufacturing, food processing, exports, digital innovation, and sustainable industrial growth. At the same time, the expanded BRICS alliance is reshaping the global economic landscape by creating new opportunities for trade, investment, technology transfer, and strategic international partnerships. Against this backdrop, the **Knowledge Chamber of Commerce and Industry (KCCI)** is organizing the **2nd Global Food Processing Summit 2026** on 15 September 2026 at The Pride Plaza, Ahmedabad.

The summit will serve as a premier international platform bringing together ministers, senior government officials, diplomats, policymakers, global investors, food industry leaders, manufacturers, exporters, technology providers, startups, MSMEs, financial institutions, research organizations, and international business associations to explore new opportunities for collaboration. Positioned as a strategic post-BRICS business engagement, the summit aims to strengthen economic partnerships, promote cross-border investments, facilitate B2B and B2G interactions, showcase India's rapidly growing food processing ecosystem, and accelerate global market access through innovation, sustainable value chains, and international business networking.
